Welcome From C.C.Hsu President of LILIN

Throughout the company's history we have maintained our belief in Creativity, Progress and Excellence and have established our reputation for delivering quality products and extraordinary customer service.

Our goal is simple; to be the best manufacturer of CCTV equipment in the world.

Our product range has expanded in line with our understanding of market requirements and our branch network continues to grow in order to better support our global customer base.

Since establishing our company over 30 years ago we have seen tremendous advances in technology and now anticipate a transition to purely digital solutions. As one of the few manufacturers that develop, produce and distribute all of the products in our range, we feel we are ideally placed to ensure a smooth transition into the digital world.

I thank you for your interest in our company and look forward to helping you with your needs in the future.

C. C. Hsu

LILIN Group

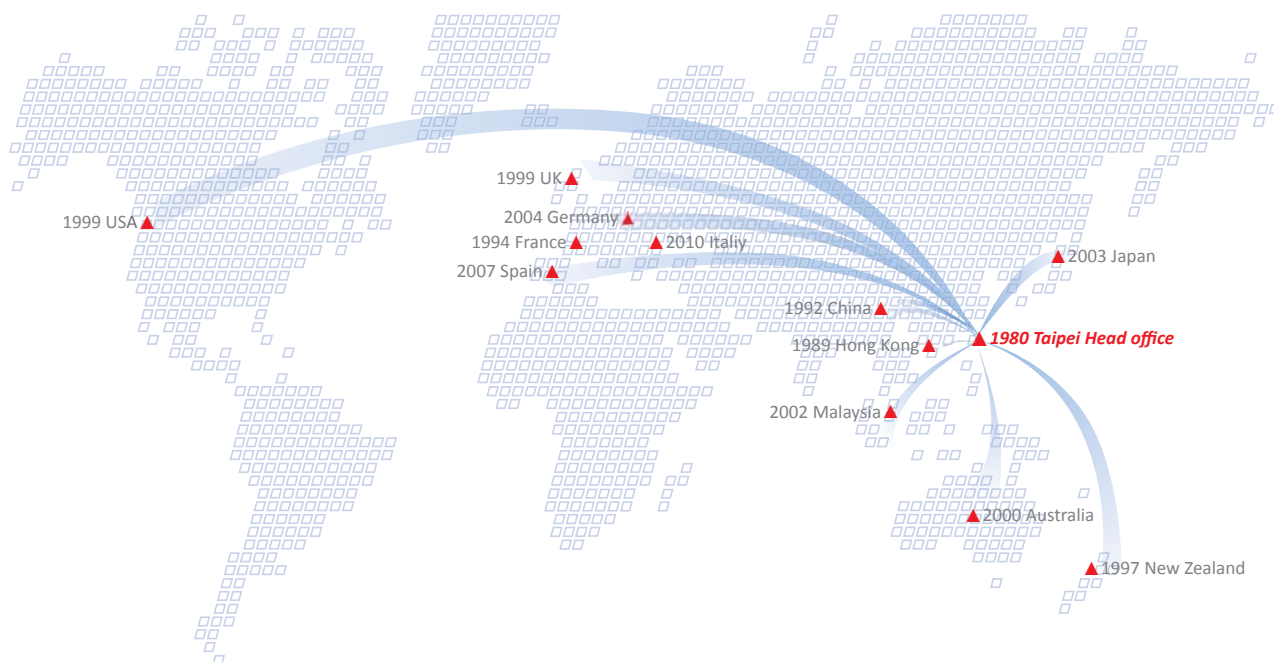

About LILIN

LILIN was founded in Taipei in 1980, when it was only a 1620 m2 small factory. Starting with only 3 to 5 staff, they worked with youth, enthusiasm, and persistence to develop CCTV products ranging from tube cameras, scanners, pan / tilt scanners, distributors, amplifiers, remote controls, to brackets. LILIN devoted 5 years in CCTV industrial development. After research and business expansion in domestic and foreign markets, the firm had created a brand of its own – CS LILIN.

As the enterprise grew over time, in 1985 LILIN purchased a 12600 m2 factory in Sanchung, Taipei, to provide more space for development and elaboration, and staff also became even more devoted to development and production of various surveillance products. During this period, Taiwan's securities industry was growing vigorously, the demand for monitors skyrocketed, and orders for cameras and other products continued endlessly. As a result, LILIN had to increase its staff from 5 to 50. Products changed from TUBE camera to CCD camera and from black and white CCD camera to color CCD camera. Even more, LILIN's first overseas branch, LILIN Hong Kong, was established in 1987 and LILIN Guangzhou was established three years later in 1990 together with LILIN France. At this time, LILIN had expanded from Taiwan to all over the globe in a bid to construct a global service network for more and better choices for customers.

With the efforts of LILIN staff, LILIN founded its first factory building at the Wuku Industrial Park in 1992, with an area of 39600 m2, tripling the land for usage. This great property allowed LILIN to go deeper into professionalism. LILIN established a specialized R&D department and hoped to develop professional surveillance systems and numerous related products to enhance system integrity. Hence, the Speed Dome camera was born. We were the first company which developed Speed Dome cameras on its own in Taiwan at that time, and day & night cameras had superior performance. While DVR started to have a draft design, other types of products continued to be innovated. Developing new appearance, flawless function, and stable quality had always been the goals of LILIN's R&D team. In order to provide better product quality and service for customers, corporate internal control system had to be perfect and complete. In 1997, we were certified by ISO-9002, which indicated that our internal control system was close to perfect. Within the time period of LILIN development, we aggressively established oversea branches and such global expansion was intended to offer broader services for customers. LILIN's objective was that not only could customers use our products worldwide, but also they could get fast and satisfying services locally.

As LILIN products started to diversify, the demand for business increased and the factories became insufficient to meet such demand. Therefore, another factory building, 87500 m2 in area, was acquired at the Wuku Industrial Park in 2002. The new property allowed staff to work in a spacious, comfortable environment, and the R&D team also grew rapidly and they were young, professional elite. In 2003, we, again, passed the ISO-9001 R&D system verification, and this suggested that our team had become even more mature and professional. The products under development progressed from analog signal to digital signal, DVR to MPEG4, H.264. Speed Dome camera functions are expected to improve, along with novel appearance and easy assembly/disassembly. And IP products H.264 MegaPixel have become the focus for current development. Ever since LILIN was founded, we have been promoting our brand and up to this day, the brand stands for honor and responsibility. Hence, LILIN continues to provide customers the best product quality, the most complete system products, as well as the fastest service network to offer greatest contentment and satisfaction.

Currently LILIN has branches all over Hong Kong, mainland China, Malaysia, Japan, New Zealand, Australia, the U.S., France, UK, Germany, Spain, Italy, etc. Ever since LILIN was founded, the number of staff has increased from 5 to over 500 at the 10 branches worldwide. This achievement is not possible without the efforts of all the staff. Everyone worked hand-in-hand for LILIN's prospective future.

As a company depending on its products for success we adhere to three fundamental belief: Creativity, Progress & Excellence. This philosophy has allowed Merit Li-Lin to achieve its position as one of the global major manufacturers of CCTV equipment.

In pursuit of growth, we have maintained the belief of continuous improvement since our company was established in 1980. Focusing on technological excellence and creative design, we have concentrated on developing new products to satisfy the needs of customers around the world.

In a competitive market wonderful product alone is never enough, underlying our corporate philosophy is our understanding of the importance of flexibility, honesty and reliability. This has earned our company an enviable reputation for first class customer service.

Our goal is to make our own brand Li-Lin internationally recognized as a sign of quality. We are achieving this by providing unrivalled customer service in every aspect of every branch throughout the world.

700TVL ICON

Camera Series
700TVL ICON

Resolution Of 700TVL Lives

By adopting a diagonal 6mm(1/3") 480K pixels, 570K pixels CCD, the camera produces clear picture quality with a horizontal resolution of 700TVL lines for color.

700 TVL

700 TVL

Conventional

High Light Compensation

Improves the visual recognition of license plates and other such objects by suppressing or masking strong light sources (such as the headlights of automobiles) in dark places.

Conventional

HLC

Adaptive Tone Reproduction

Improves the visibility of the entire picture by providing the optimum gradation compensation.

Conventional

2D ATR

AWB

Allows the color camera to adjust the tone according to the light source, adjust to produce white color while detecting white color object in the scene.

AWB OFF

AWB ON

Noise Reduction

Reduces the image noise in order to improve the image quality of the camera ,in particular ,it reduces the noise which is generated under low-brightness shooting conditions and other high-gain states

► Noise reduction keeping image sharpness (2D)

NR Off

Conventional NR

Preserved edge by New 2D-NR

Privacy Zone

Privacy zones prevent objects and areas such as windows and doors which are within in the camera's viewing range but not in the scope of surveillance , 8 masking areas per screen simultaneously.

Conventional

Privacy Zone

OSD

This camera provides an on screen display (OSD) setup menu where all advanced functions can be selected and setup via OSD

Color Rolling Suppression (ANTI CR)

Suppresses the color rolling which arises when there are slight deviations between the blinking frequency of non -inverter fluorescent lights and the drive frequency of the image sensor devices.

ANTI CR

Vari-Focal

Adjustable lens, can zoom in or zoom out, and iris adjust automatically.

Vari-Focal

Zoom in

Zoom out

Wide Dynamic Range

Wide Dynamic Range – utilizes 1/3" Vertical Double-Density Interline CCD Sensor incorporating powerful 3D WDR, captures cleaner and superior high resolution pictures even in harsh lighting conditions typically experienced when outside sunlight and indoor light sources overlap.

BLC

When light is behind the main object, the main object and back ground's light and shade contrast is big, uses backlight compensation function to make both main object and background exposure level close.

BLC OFF

BLC ON

Highlight Suppress Back Light Compensation

The HSBLC function that effectively blocks strong light sources such as headlights. It provides optimum performance in recognizing vehicular license plates and objects at night.

Conventional

HSBLC

Day & Night with IR Cut Filter

Day & Night- equip with built-in Mechanical ICR filter perfect for 24-hour and 7 day (24/7) surveillance. It provides perfectly visible colors during daylight and IR Cut filter remove automatically at night time to give clear B/W images at night as well.

D&N Superhigh Resolution Camera

Features

- Accepts 850nm peak wavelength infrared light sources enabling Day&Night surveillance.
- This is a highly sensitive camera with minimum scene illumination, ensuring good quality images in low light environments.
- When using manual or fixed iris lenses, the electronic shutter function controls the amount of light captured by the CCD by altering the shutter speed between 1/50(1/60)~100,000 of a second.
- Subjects lit from behind can be automatically enhanced through DSP control of the iris and shutter speeds, compensating for poorly illuminated scenes.
- Refining captured image outlines for a sharper video image.
- Automatically tracks the changes in the color temperature, and adjusts the white balance. The color temperature ranging from 2000K to 18000K.
- DC Auto Iris lens can be used.
- Built-in highly sensitive capacitive microphone allows setting up of audio monitoring system.
- Use this ring to adjusts the back-focal distance or picture focus.

Features

- Ultrahigh resolution 600 TV Lines
- Wide dynamic range ratio 4000 : 1
- 3D Digital Noise Reduction
- EIS (electronic image stabilization)
- HSBLC (highlight suppress back light compensation)
- OSD Menu Setup
- 10X Digital zoom
- Up to 8 Privacy masking zones
- Sens-Up –equipped with a maximum X256 sens
- 3-Axis camera construction
- Screw-on design dome cover for easy and secure installation
- Day and night applications for 24Hr surveillance
- Support 4~9 mm Lens (Option)

Dimensions Ø120 x 102mm

25X Day & Night High Resolution Fast Dome Camera

The PIH-7625 series Day & Night High Resolution Fast Dome Camera is equipped with a 25x optical zoom lens. Combined with a 256x digital zoom, for a total zoom capability up to 4600. The PIH-7625DW series Day & Night High Resolution Fast Dome Camera is equipped with a 25x optical zoom lens. Combined with a 2.56x digital zoom, for a total zoom capability up to 64x, this camera can identify distant subject. With its 400:1 Wide Dynamic Range, the PIH-7625DW Series works beautifully even when contrast changes from scene to scene. Area free natural contrast image correction ensures accurate reproduction, whatever the subject. With 480 TVL resolution (color) and 520 TVL resolution (mono). They also provide images stay clear during night time and sharp in lighting as low as 0.1 Lux (in color) and 0.01 Lux (in Mono) with ICR Day & Night feature.

Day / Night & Human Tracking System Fast Dome Camera

The 25X Fast Dome Camera incorporates an IR Cut Filter mechanism which automatically switches between color during the day and mono at night. Offering unrivalled picture quality, the camera provides a wealth of features and is extremely simple to install and operate. The PIH-7625T has a built-in intelligent video processing chip to improve accuracy and eliminate false action occurrence. Different from other cameras, our new technology allows us to manage the motion tracking function with a single camera. The system will auto zoom and monitor the object on the screen.

25X/30X/35X Day & Night Super High Resolution Fast Dome Camera

The new LILIN PIH-7625/7630/7635DH series Day & Night Super High Resolution Fast Dome Camera is equipped with a 25x/30x/35x optical zoom lens. Horizontal resolution is also significantly higher, 520 lines (typical) in color or 580 lines in Mono. It also provides images stay clear during night time and sharp in lighting as low as 0.1 lux (in color) and 0.01 lux (in Mono) with IR Day & Night feature. Its 0.15°/sec. slow speed fine control and powerful zoom let you zoom in smoothly on your subject. In addition, PIH-7625/7630/7635DH series provides premium features such as 128 presets, 8 privacy zone, ensuring the data protection and security requirement. The PIH-7625/7630/7635DH demonstrates the best stability and reliability for your security.

25X/30X/35X Human Tracking System Fast Dome Camera

The new LILIN ST125/130/135 series Human Tracking System Fast Dome Camera is equipped with a 25x/30x/35x optical zoom lens. Horizontal resolution is also significantly higher, 520 lines (typical) in color or 580 lines in Mono. It also provides images stay clear during night time and sharp in lighting as low as 0.1 lux (in color) and 0.01 lux (in Mono) with IR Day & Night feature. Its 0.15°/sec. slow speed fine control and powerful zoom let you zoom in smoothly on your subject. In addition, ST125/130/135 series provides premium features such as 128 presets, 8 privacy zone, ensuring the data protection and security requirement. Moreover, new intelligent functions, auto tracking function.

25X/30X/35X Outdoor Day & Night Super High Resolution Fast Dome Camera

The new LILIN PIH-7525/7530/7535DH series Outdoor Day & Night Super High Resolution Fast Dome Camera integrates a weatherproof housing, 360° high-speed pan and tilt base, and 25x/30x/35x optical zoom lens. Up to 255 arbitrary positions can be preset and such preset positions can be instantaneously repeated. Moreover, horizontal resolution is also significantly higher, 520 lines (typical) in color or 580 lines in Mono. It also provides images stay clear during night time and sharp in lighting as low as 0.1 lux (in color) and 0.01 lux (in Mono) with IR Day & Night feature. Features

- Support RAID-0, RAID-0+1, and NRAID modes
- Easy-to-use without complicate system setting, and Plug-and-play design allows interfacing with a DVR or a PC via SATA cable.

Dimensions 434(W) x 470(D) x 45(H)mm

(Unit:mm)

PSH-100 Stand-alone e-SATA Raid hard disk storage system	
Host Interface	SATA
Host Transfer Rate	150MB / Sec.
Hard Drive	4 x 3.5" SATA Drive
Largest Capacity	RAID-0 up to 2TB, RAID-0+1 up to 1TB
Support Big Drive	Yes
RAID Level	RAID-0 RAID-0+1 NRAID
Support Hot-Swap	Yes
LCD Display	Yes
O.S. Independent	Mac 10.2, Windows 2000/2003/XP, OS Independent (SATA)
Power Supply	AC90~260V Max., 85W
Dimension	434(W) x 470(D) x 45(H)mm
Weight	5.6Kg (W/O HDD)
